# The Art of Explanation

### General Ideas

- Nnow who you are talking to
  What do they already know?
  What do they want to know?
  What would they like to receive the information?
  Directly speak to them or their specific group
  Show credibility and authority regarding the topic
  If you are telling a story people want to hear the end of or want to be part of, they are likely to be engaged in it

Use short words and sentences NO: complex words, unnecessary detail Is this the simplest way I can say this? Use only information that helps the point you try to explain What is essential to the explanation? Understand the topic yourself before explaining Are there aspects of this you don't understand? Make it as short as possible Try multiple ways of how to explain it Is this the best way to say this? Define what you want to say Choose the right words to say it Am I saying exactly what I want to communicate? Explain why it matters Use sentences like:  • The reason this matters is • All of this connects back to • This does not happen in isolation. • This is important, because  Why does this matter to the people you are addressing? People loose interest when they don't understand a word or reference Either explain it or cut it	7 Steps of creating an  1. Set-Up  2. Find Information  3. Distil Information  4. Organize Information  5. Link Information	Summarize in one sentence what you want to say How long does it have to be? Go through the 10 principles of a good explanation and try to answer the questions Collect everything relevant to the explanation Be conscious of the validity of your sources Double check the information Have a list of questions to answer Have a list of what you don't understand Divide the information to smaller parts Oute the verything that is not necessary One for page in the information Go through the information several times and cut everything unnecessary  Identify the strands of the explanation Strand = logical sections, chunks or themes of information Make a list of the strands in your explanation Define a purpose for each strand Experiment with putting the strands together in different orders Think of visual elements to support what you say Avoid generic visual elements. Start Writing If you get stuck you are either unsure what to say or how to say it Write only how you would speak. If it sounds weird spoken, change it	Dynamic Expla Follow the same : Steps 1-3 are the The other steps d  4. Organize Information  5. Verbalize  6. Memorize	r steps same

People loose interest when they don't understand a word or reference  Either explain it or cut it	2. Find Information 3. Distil Information 4. Organize Information	How long does it have to be? Go through the 10 principles of a good explanation and try to answer the questions  Collect everything relevant to the explanation Be conscious of the validity of your sources Double check the information Have a list of questions to answer Have a list of what you don't understand  Divide the information to smaller parts Cut everything that is not necessary Look for gaps in the information  Go through the information several times and cut everything unnecessary  Identify the strands of the explanation Strand = logical sections, chunks or themes of information Dafine a list of the strands in your explanation Dafine a purpose for each strand Experiment with putting the strands together in different orders Think of visual elements to support what you say Avoid generic visual elements.  Start Writing If you get stuck you are either unsure what to say or how to say it	Steps 1-3 are the The other steps d  4. Organize Information  5. Verbalize	Create the strands of your explanation Limit yourself to 5 pieces of information per strand (Main Point, 3 Facts & Context) Read the explanation out loud See what works and where you struggle Verbalize the strands individually Use Bridging Phrases:  while X is also important One aspect is X, another is Y  Chunking = a memory technique where you put information together and label it as a single thing in your mind  I. Identify the key information G. Group related Items to chunks Label each chunk connect them with something you can remember Put the chunks together  Put the strands together in chunks
What is essential to the explanation? Understand the topic yourself before explaining Are there aspects of this you don't understand? Make it as short as possible Try multiple ways of how to explain it Is this the best way to say this? Define what you want to say Choose the right words to say it Am I saying exactly what I want to communicate? Explain why it matters Use sentences like: • The reason this matters is • All of this connects back to • This does not happen in isolation. • This is important, because Why does this matter to the people you are addressing? People loose interest when they don't understand a word or reference Either explain it or cut it	3. Distil Information 4. Organize Information	Be conscious of the validity of your sources Double check the information Have a list of questions to answer Have a list of what you don't understand Divide the information to smaller parts Cut everything that is not necessary Look for gaps in the information Go through the information several times and cut everything unnecessary  Identify the strands of the explanation Strand = logical sections, chunks or themes of information Make a list of the strands in your explanation Define a purpose for each strand Experiment with putting the strands together in different orders Think of visual elements to support what you say Avoid generic visual elements.  Start Writing If you get stuck you are either unsure what to say or how to say it	5. Verbalize	Limit yourself to 5 pieces of information per strand (Main Point, 3 Facts & Context) Read the explanation out loud See what works and where you struggle Verbalize the strands individually Use Bridging Phrases:  another thing is  while Xis also important  One aspect is X, another is Y  Chunking = a memory technique where you put information together and label it as a single thing in your mind  1. Identify the key information 2. Group related items to chunks 3. Label each chunk connect them with something you can remember 4. Put the chunks together  Put the strands together in chunks
Are there aspects of this you don't understand?  Make it as short as possible Try multiple ways of how to explain it  Is this the best way to say this?  Define what you want to say Choose the right words to say it  Am I saying exactly what I want to communicate?  Explain why it matters  Use sentences like:  The reason this matters is  All of this connects back to  This does not happen in isolation.  This is important, because  Why does this matter to the people you are addressing?  People loose interest when they don't understand a word or reference  Either explain it or cut it	4. Organize Information	Have a list of what you don't understand  Divide the information to smaller parts Cut everything that is not necessary Look for gaps in the information  Go through the information several times and cut everything unnecessary  Identify the strands of the explanation Strand = logical sections, chunks or themes of information Make a list of the strands in your explanation Define a purpose for each strand Experiment with putting the strands together in different orders Think of visual elements to support what you say Avoid generic visual elements.  Start Writing If you get stuck you are either unsure what to say or how to say it		See what works and where you struggle Verbalize the strands individually Use Bridging Phrases:  another thing is  while Xis also important  One aspect is X, another is Y  Chunking = a memory technique where you put information together and label it as a single thing in your mind  1. Identify the key information  2. Group related items to chunks  3. Label each chunk connect them with something you can remember  4. Put the chunks together  Put the strands together in chunks
Make it as short as possible Try multiple ways of how to explain it  Is this the best way to say this?  Define what you want to say. Choose the right words to say it  Am I saying exactly what I want to communicate?  Explain why it matters  Use sentences like:  The reason this matters is  All of this connects back to  This does not happen in isolation.  This is important, because  Why does this matter to the people you are addressing?  People loose interest when they don't understand a word or reference  Either explain it or cut it	4. Organize Information	Cut everything that is not necessary Cook for gaps in the information Go through the information several times and cut everything unnecessary Identify the strands of the explanation Strand = logical sections, chunks or themes of information Make a list of the strands in your explanation Define a purpose for each strand Experiment with putting the strands together in different orders Think of visual elements to support what you say Avoid generic visual elements. Start Writing If you get stuck you are either unsure what to say or how to say it	6. Memorize	Verbalize the strands individually Use Bridging Phrases: another thing is while X is also important One aspect is X, another is Y  Chunking = a memory technique where you put information together and label it as a single thing in your mind  I. Identify the key information G. Group related items to chunks Label each chunk connect them with something you can remember Put the chunks together  Put the strands together in chunks
Choose the right words to say it  Am I saying exactly what I want to communicate?  Explain why it matters  Use sentences like:  The reason this matters is All of this connects back to This is important, because  Why does this matter to the people you are addressing?  People loose interest when they don't understand a word or reference.		Identify the strands of the explanation Strand = logical sections, chunks or themes of information Make a list of the strands in your explanation Define a purpose for each strand Experiment with putting the strands together in different orders Think of visual elements to support what you say Avoid generic visual elements.  Start Writing If you get stuck you are either unsure what to say or how to say it	6. Memorize	Chunking = a memory technique where you put information together and label it as a single thing in your mind  I. Identify the key information C. Group related items to chunks Label each chunk connect them with something you can remember Put the chunks together Put the strands together in chunks
Use sentences like:  • The reason this matters is  • All of this connects back to  • This does not happen in isolation.  • This is important, because  Why does this matter to the people you are addressing?  People loose interest when they don't understand a word or reference.	5. Link Information	Define a purpose for each strand Experiment with putting the strands together in different orders Think of visual elements to support what you say Avoid generic visual elements. Start Writing If you get stuck you are either unsure what to say or how to say it		3. Label each chunk connect them with something you can remember     4. Put the chunks together     • Put the strands together in chunks
This is important, because  Why does this matter to the people you are addressing?  People loose interest when they don't understand a word or reference.  Either explain it or cut it	5. Link Information	If you get stuck you are either unsure what to say or how to say it		
reference Either explain it or cut it		If you get stuck you are either unsure what to say or how to say it		Combine them to coherent arguments
Only use images and graphs when you reference them directly		Back-Annos = Back announcements Recaps or summaries of what just has been said. Use a part of the information and reframe it with some new. e.g. Main point: "Global temperatures have risen by 1.1 degrees		Memory Methods  All these methods link different kind of information to things you know and remember.
Are there verbal, written or visual distractions?  If one part is not interesting you might loose the attention  Look for parts that might be weaker than others	-	Main point: 'load temperatures have risen by 1.1 degrees Celsius since pre-industrial times.''  Back-anno: "That means the planet is already significantly warmer than it used to be."  Writing Techniques:  Look for hard stops in the reading flow Use connecting sentences between parts Show the structure and how things connect Joining phrases and "hooks"  Split longer sentences into small ones Use Back-Annos		Link Craft a story of the information  Method: Connect the information with elements and words from the story
Where could the attention get lost?				Journey Connect the information to landmarks on a route you are familiar with
Look for questions someone might have  Do you answer the questions people have?				Memory Palace: Connect the information to different places in an environment you are very familiar with
Make sure you know exactly what you want to say     What are you trying to explain?			7. Questions	Look for questions, likely to be asked. What would you like to know? What would you rather not be asked? Is part of peripheral topics? Look up information about the interests of your audience Prepare answers to all questions you can find
	6. Tighten	Go through it and delete everything unnecessary Delete also elements you worked hard on, if needed Look for complicated works and sentences Delete them or make them easier Go through the 10 Principles of a good explanation Get a second opinion		
			Quick Explanations  Techniques to use in situations where time is rare  When you have no time, focus on:  • What topics to cover  • What you want to convey  • What you want from them  Writing Emails  • Keep in mind, the reader might just skim the mail or not read it at all  • Format the mail to emphasize the critical points  • Make the first thing they read relevant to them  Use as few words as possible. Even bullet points.  • Target people not groups  • Highlight important information  • Only short paragraphs	
	7. Delivery	Package the explanation to be engaging Place the visual elements aligned with the explanation Use the right formatting Font size big enough to be seen at a glance 1.5 line spacing		
		When verbally presenting Make Bullet points Reduce the information as much as possible, while being able to remember the information Practice the explanation for flow (Make notes for pauses, what to emphasize and where to just go ahead) Practice each strand separately and the whole evaluation		
		7. Delivery	Go through the 10 Principles of a good explanation Get a second opinion  7. Delivery  Package the explanation to be engaging Place the visual elements aligned with the explanation Use the right formatting Form size big enough to be seen at a glance 1.5 line spacing  When verbally presenting When verbally presenting A Make Bullet points Reduce the information as much as possible, while being able to remember the information Practice explanation for flow (Make notes for pauses,	On through the 10 Principles of a good explanation     Ofet a second opinion      Package the explanation to be engaging     Place the visual elements aligned with the explanation     Use the right hornatting     Font size big enough to be seen at a glance     Sine spacing     Nake Bullet points     Reduce the information as much as possible, while being able to reduce the information     Practice the explanation for flow (Make notes for pauses, what to emphasize and where to just go ahead)     Practice and where to just go ahead)     Practice strands spaced and where to love the explanation  Practice strands spaced and where to love the explanation  Practice strands spaced and the explanation  Practice strands spaced spaced and the whole explanation

## Helpful Phrases

### Connecting Points:

- If you're wondering how X we did Y.
   I've talked about how X. I am going to show you and then afterwards Y
   I want to take a few more minutes to tell you X. Once I've done that, I promise I'll show you Y

- Now we have looked at X, the next part of this issue is Y.
  We can't understand X unless we consider how it connects to Y.
  So far we have considered X and Y but Z is also important.
  Put X and Y together, and that leads you to the next factor: Z.

- That fact helps us understand this issue. But it's not the full picture. To get that, you also need to factor in X...
  My first goal had been achieved. But that immediately led me on to a second goal which was to prove a lot harder.
  If some colleagues were telling me they were angry at what I was suggesting, listen to what else I was being told.
  Those were the numbers for last year. Now look at what has happened this year so far...

- Bridging Phrases:

  ... another thing is...

  ... while ... X is also important

  One aspect is X, another is Y

### Escape Phrases for switching topics:

- You're right, that is important. As is ...

- You're right, that is important. As is ...
  I think that's one important it issue. Another that ties into this issue is ...
  On that, I'd agree, but if we look elsewhere...
  It's amazing the number of factors here. That is one but also think about...
  You're quite right to raise that. I'd also highlight...
  One other thing I'd mention...
  I completely agree. Also...
  Yes. And that's just one of a number of issues . . .
